

CLASSIC

Phleum pratense

- High competitiveness
- Even yield distribution
- Very persistent
- Good disease tolerance

A reference variety

CLASSIC has been the top rated variety of the Dutch Recommended List since 2000. CLASSIC is also recommended in Germany. The heading date is intermediate.

Winter hardy, for both cutting and grazing purpose

CLASSIC is highly suitable for cutting and grazing and has an excellent winter hardiness. It will show superior spring growth to other grasses after a severe winter or in a cold spring.

Adapted to mixtures with several species

It is well adapted to cool and wet conditions and combines well with perennial ryegrass, festulolium, cocksfoot and meadow fescue but also with red clover and alfalfa.

Technical Specifications

- Timothy
- Winter hardy with even yield distribution
- Listed/recommended in EU DE LU

Performance of Classic in the Netherlands

Source: Rassenlijst CSAR 2015. Scale for scores: 1-9, 9 is best

	Heading date	Competitiveness	Persistency	Resistance to purple eyespot	Relative dry matter yield of 1st cut	Relative total dry matter yield
Promesse	2-6	6,6	7,0	7,0	106	102
Classic	5-6	7	7,1	7,0	98	102
Motim	12-6	6,5	7,4	6,1	100	101

Ratings

Scale 1-9, where 9 = best or most pronounced
