

MAHINDRA

Festuca commutata

- Excellent for extensive areas / landscaping
- Attractive medium green colour
- Good performance in shady conditions

“Chewings fescue are known for their ability to avoid thatch building up. Mahindra offers proven disease tolerance and a fine, soft texture to lawn and landscape use.”

Marie Oskarsson, Product Manager, DLF

Fine leaves

MAHINDRA convinces you with its excellent fineness of leaves.

Enjoy the fine leaved lawn that bring natural health to home lawns and green landscapes.

Besides the very fine leaves MAHINDRA also proves its very dense growth habit that leaves no space for unwanted weeds.

Thriving even in the shade of trees and buildings Mahindra is your versatile mixing partner for lawn and landscape. Its medium green colour is perfect for many uses and deliver a soft blanket to any picnic and outdoor activity.

Healthy all-rounder

DLFs international breeding program created MAHINDRA with a proven tolerance to red thread disease and rotting. By using MAHINDRA you will reduce resource input and increase your lawn quality output.

MAHINDRA combines all benefits in one variety to be a true allrounder for your private lawn and landscape use.
