

Breathe new life into your lawn with SeedBooster®

Seed and fertiliser in one

- Environmentally friendly
- Feed the seed – not the weed
- A new lawn faster
- Less work

Energise your lawn

Before

Every lawn deserves to live its life to the full. Yours could also be thick, green and inviting. All it takes is a packet of SeedBooster® to nurse it back to health – to revive and energise your lawn for a season of lush green growth.

Just one application and the job's done.

Grow a healthier lawn, faster

Repair a patchy and unhealthy looking lawn in one go. SeedBooster® is seed and fertiliser in one. Just sow it into your lawn – ‘overseeding’ as professionals call it – and let nature take its course.

Because each seed is wrapped in its own parcel of fertiliser, the seed germinates

After SeedBooster®
treatment

sooner and establishes faster. You get up to 30% more grass and a denser lawn with a single application of SeedBooster® than you would by sowing seed and fertiliser separately. You get more green lawn for less work – and you get there sooner.

Follow up with a summer of rest and recuperation

To spend your summer lazing on a carpet of lush green growth, energise and revive your lawn now with a single application of SeedBooster®.
