

AMBA

Dactylis glomerata

- High yield of drymatter
- High digestibility compared to other early varieties
- Very winterhardy
- Early flowering and production

High Yield Right from the Start

AMBA establishes well and has a strong growth right from the start.

High Digestibility

AMBA has proved to have a digestibility on the level of the more late varieties. This is unique for an early variety.

Very Good Winterhardiness

AMBA has proven a very high winterhardiness. Also the tolerance to late night frost in the spring is very good.

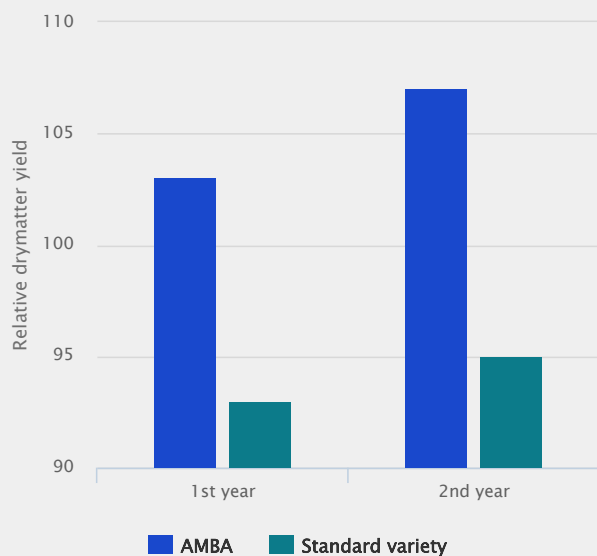

Technical Specifications

- Cocksfoot/Orchard grass
- Combining Early Growth with Yield and Quality
- Listed/recommended in EU AT BA BY EST
- Lateness: Early
