

ANGELINA

Lolium perenne

- Fast recovery after wear
- Excellent red thread tolerance
- High shoot density
- Slow regrowth for lawn use

Hard wearing with excellent recovery

ANGELINA resist wear very well and combined with excellent recovery the persistency and competition with annual bluegrass and weeds are enhanced.

Red thread tolerance

ANGELINA shows excellent red thread tolerance in STRI Sport and Lawn trials. This enlarges use to lower input areas. With the fast recovery it is an obvious choice for golf tees and fairways.

Slow regrowth

With high disease tolerance and very slow regrowth ANGELINA fits in for use on lower maintenance areas, including home lawns.

Technical Specifications

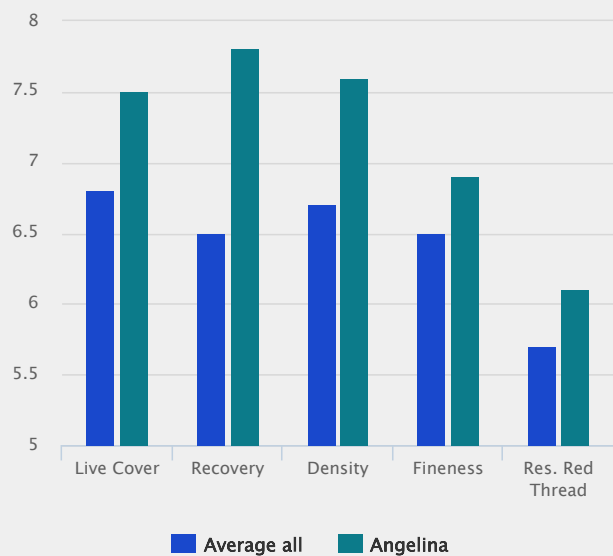

- Perennial ryegrass
- Excellent recovery from wear and outstanding red thread tolerance
- Listed/recommended in EU NL
RU UK
