

BIRTLEY

Lolium perenne

- Wide spring window - 57 days!
- Early start in the spring
- Excellent rust tolerance
- Good persistency

Very good flexibility in the spring

Especially for a intermediate heading PRG.

Very high rust resistance

The forage quality is maintained even in summer/autumn due to excellent disease tolerance and reduced aftermath heading.

Uses & Mixture proposals

BIRTLEY can be used for:

- grazing
- conservation as hay/silage
- mixed use

In mixtures with:

- Other PRG varieties 2n or 4n
- White clover for increased protein content and autonomy in nitrogen fertiliser needs.

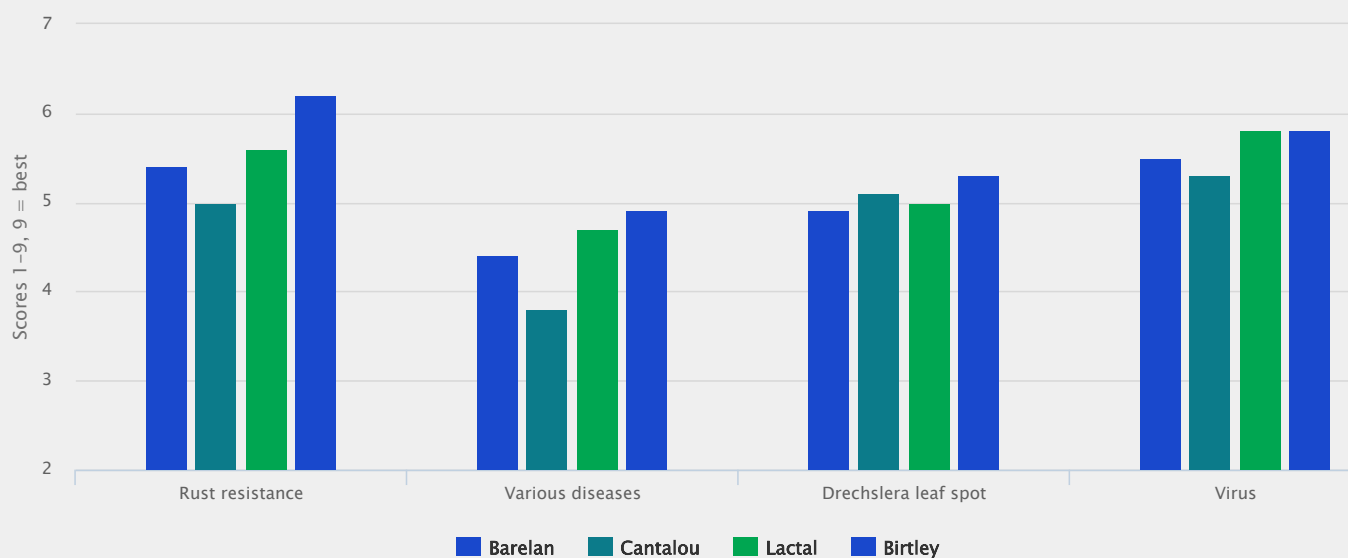

Technical Specifications

- Perennial ryegrass
- Wide spring window and excellent disease tolerance
- Listed/recommended in EU
BE DE FR NL
- Lateness: Intermediate

Specification and ratings

Excellent tolerance to several diseases
