

BLNHEIM

Festuca commutata

- High winter and summer wear tolerance
- Excellent winter aspect
- Good disease resistance
- Medium green colour

Higher wear tolerance both summer and winter

During both winter and summer BLNHEIM shows better wear tolerance than the majority of chewing fescues. This is a strong argument for using BLNHEIM in high traffic/play areas.

Superb winter aspect

During the winter BLNHEIM manages to maintain a very high visual merit.

Good disease tolerance

BLNHEIM shows good tolerance to common diseases.

STRI top ranking

For lawns mown at 10-15 mm BLNHEIM is top ranked on the latest Turfgrass list from STRI-UK. BLNHEIM well suited for parks, playgrounds, landscaping and everywhere where high visual merit is of importance – all-year-round!

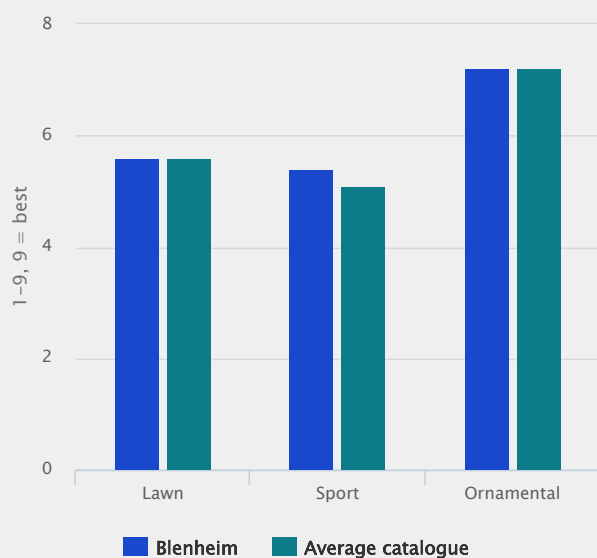

Technical Specifications

- Chewing fescue
- Superior wear tolerance and winter aspect
- Listed/recommended in FI SCA
