

CAPRICCIO

Festuca commutata

- Fast establishing Chewings Fescue
- Superior wear tolerance
- High Fusarium resistance
- Maintains nice appearance during winter

4salt

Great appearance The general appearance is at a high level and is very constant throughout seasons and environments with high adaptation to main uses.

High disease tolerance

CAPRICCIO shows excellent tolerance to common diseases as red thread and rusts. The resistance to Fusarium (*Gerlachia nivalis*) is better than in most other varieties of chewing fescue.

Dense, fine and valuable mixture component

CAPRICCIO is very winter hardy and will add extra persistency to mixtures intended for cold areas and largely contribute with improved density and fineness. With scores 8-8*-7 on the German RSM list the high quality is further underlined.

Wear tolerance far above average

Generally Red Fescues don't exhibit high wear tolerance, but CAPRICCIO shows a markedly higher tolerance than the majority of chewing's fescues, extending the possible uses and allowing for better persistency.

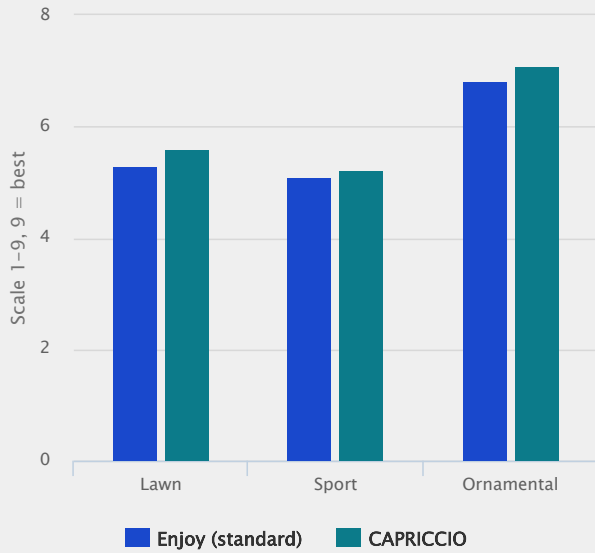

Technical Specifications

- Chewings fescue
- Fast establishing - Fresh green but low and slow growing
- Listed/recommended in EU
