

CARRAIG

Lolium perenne

- Early to intermediate heading
- Suitable for grazing as well as cutting
- Tetraploid (4n)
- High production of dry matter

Suitable for grazing and cutting

High yields under both management for grazing or cutting, adding flexibility to mixtures.

Carraig is tetraploid with excellent palatability.

Ear emergence

Carraig is rather early heading, but classified as intermediate in The Republic of Ireland.

Technical Specifications

- Perennial ryegrass
- Tetraploid - Early - intermediate heading suited for cutting and grazing
- Listed/recommended in UK
