

# CONNI

*Poa pratensis*

- Fine leaved
- Dense
- Good wear tolerance
- Real value for money

## 4salt

### Growth

CONNI produces a lot of tillers and has an erect habit of growth, which gives a very dense, uniform turf. The rate of growth is medium to slow.

### Wear Tolerance

CONNI has a very good wear tolerance and is highly suitable for both ornamental lawns and sports grounds.

### Broad Disease Resistance

The high scoring of CONNI in trials all over Europe proves that CONNI contains a very effective and broad resistance to general diseases of *Poa pratensis*.

### Broad Adaptability

The very broad adaptability has made CONNI one of the most sold varieties in Europe in the quality segment of *Poa pratensis*. Wherever CONNI has been listed it has obtained very good results and is widely recommended.
