

# DIWAN

*Lolium perenne*

- Top yielding through the season
- Very large spring window
- Excellent rust resistance
- Very high 1st cut

## Early spring start and intermediate heading

The spring window is so large (57 days) that DIWAN seriously competes with semi-late heading varieties. The aftermath heading is very reduced, qualifying DIWAN for grazing purposes.

## Excellent disease resistance

DIWAN proved significantly better rust resistance than the tree standards. But also better resistance to:

- Leaf spot
- Viruses
- Various diseases

## Dry matter yield

Right from the 1st cut DIWAN shows better dry matter yield than the standards, with a total of +6% for the three-year trial period.

## Technical Specifications

- Perennial ryegrass
- Large spring window with top yield
- Listed/recommended in EU AT BY DE FR NL RU UK
- Lateness: Intermediate
