

ELVIS

Lolium multiflorum

- High yielding
- Excellent rust tolerance
- Persistent and winter-hardy
- Good combination of all essential characteristics

Top variety on the Swiss recommended list

Elvis is on the recommended Swiss list of Italian ryegrasses, with a particularly interesting combination of characteristics. The very high yield capacity, takes Elvis to the top of the list.

Excellent rust tolerance

Elvis produces abundant and healthy forage even with conditions favourable for development of rusts and other foliar diseases.

The best digestibility

Among the varieties recommended in Switzerland, Elvis has the best score for digestibility that was confirmed in Irish trials.

Add good persistence and we are close to the perfect variety!

Technical Specifications

- Italian ryegrass
- Very digestible high yielding Italian ryegrass
- Listed/recommended in EU CH
- Lateness: Intermediate

High digestibility

Ireland: relative dry matter digestibility; Switzerland: Score 1-9, 1 is best

	Ireland 2007	Switzerland 2015-16
Reference varieties	78,3 (average check varieties)	5.3 (average all recom. varieties)
Elvis	101,2	4,3

Results for persistence and winter hardiness

Switzerland 2010: Low score = better performance

	Persistence	Winter kill
Interval for recommended varieties	5,0 - 3,5	4,9 - 3,9
Score of Elvis	4,3	4,1
