

GIANT

Lolium perenne

- Very productive
- High yield
- High first cut
- High resistance to diseases

Gigantic yield!

This high yielding variety of our early heading perennial ryegrass program has been listed in Germany by the BSA because of the total yield result with grade 8 out of 9 possible. GIANT fits into all cut oriented mixtures since the first cut and all further cuts are large..

GIANT fits perfectly with modern farm management. GIANT showed the lowest infestation with weed in the trials, and yield can be harvested safely with high quality and brought to the silo. Finally, GIANT is equipped with high resistance to diseases.

All in all GIANT is a first-class variety for high yield mixtures for quality forage

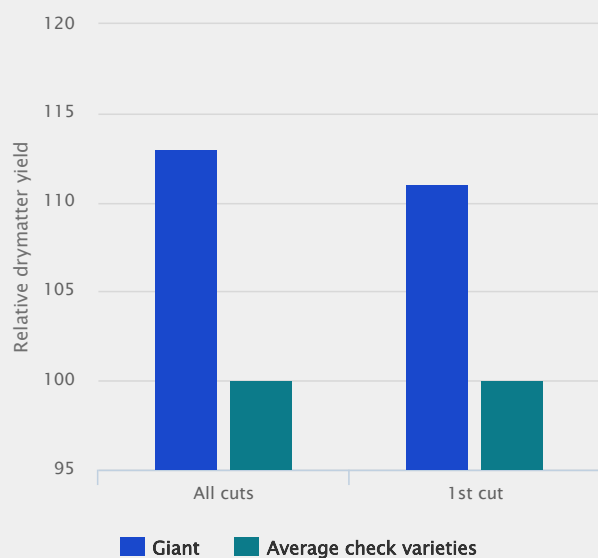

Technical Specifications

- Perennial ryegrass
- This yield will be gigantic!
- Listed/recommended in EU
BE DE IE
- Lateness: Early

Specification and ratings

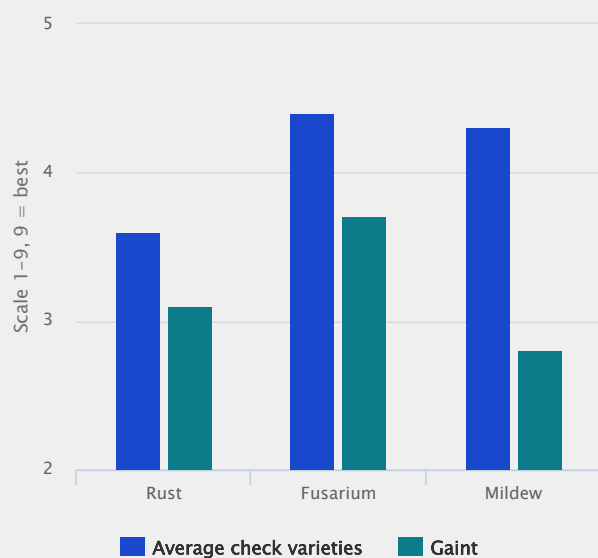

The variety with the highest yield in the early segment

BSA, Official Trials, Germany

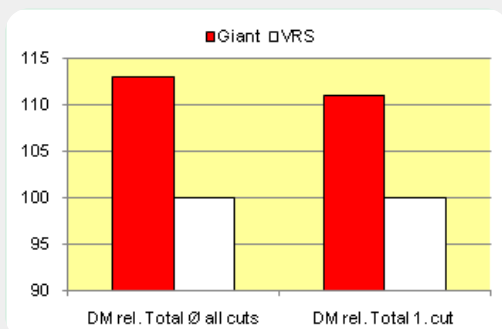

Very good disease resistance
