

GOLDONI

Lolium multiflorum

- Very high first cut yield
- High total yield
- Good disease resistance
- Good winterhardiness

Healthy and vivid

In trials Goldoni was the best variety in terms of rust resistance.

It also proved to be one of the best for snow mould (*Fusarium*) resistance (see table).

Goldoni was also in top three in the criteria winter hardiness - proving a good persistency.

Goldoni = plenty of healthy forage

High dry matter production of Goldoni in the spring, leads to a very high yield in the first cut.

Goldoni also outclasses other varieties in terms of the total yield over all cuts.

This combination of excellent disease resistance and high yield enables Goldoni to produce high amounts of tasty and healthy forage.

In fact, this unique combination is the key to your success with the top variety Goldoni.

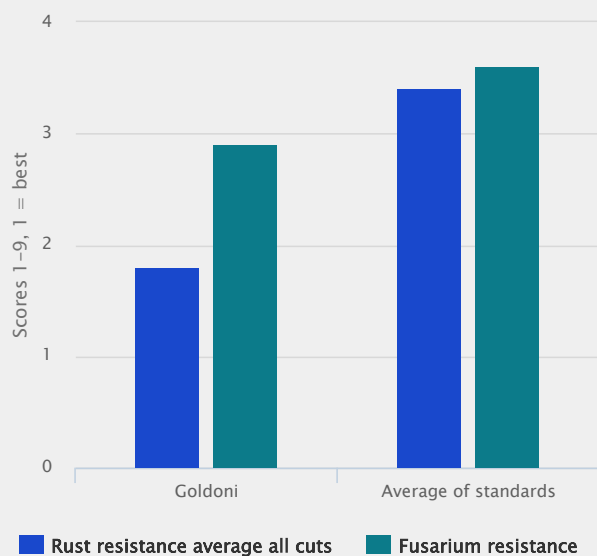

Technical Specifications

- Italian ryegrass
- Tetraploid Italian Ryegrass with a very high 1st cut yield
- Listed/recommended in DE
- Lateness: Intermediate
