

GREENFRONT

Festuca arundinacea

- Excellent disease tolerance
- Very dark colour
- High tolerance to leaf spot disease
- Very wear tolerant even during the winter season

A very disease tolerant variety

Official trials have shown high tolerance against:

Rusts (*Puccinia* sp.)

Leaf spot (*Drechslera*)

Red thread (*Corticium*)

Nice dark colour

With a score for colour of 7 in the French catalogue, Greenfront merits the qualification "very dark".

Uses

Numerous uses are possible due to the high wear and tear tolerance:

Sport pitches

Playgrounds

Rough (golf)

Private lawns

Municipal park

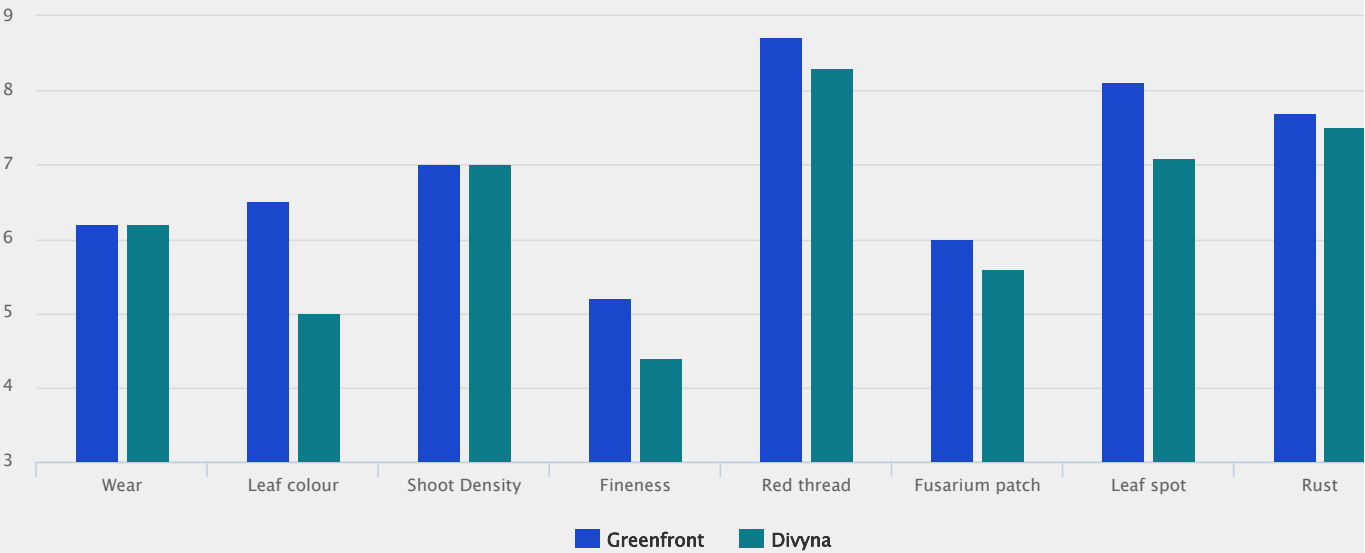

Technical Specifications

- Tall fescue
