

JOHNSONS SLOW GROW

Johnsons Lawn Seed

- Fast establishment
- Slow growth
- Dense and dark
- Less mowing

Slow Grow

Slow Grow establishes rapidly to provide a dark, dense and attractive reduced maintenance lawn. Slow Grow mixture also means less mowing, less clippings and more time for you.

Slow Grow uses a specially selected slow growing, hardwearing Perennial Ryegrass. This is combined with Red Fescue to create an all purpose lawn that does not grow too quickly.

The Slow Grow mixture will perform well in the majority of domestic situations.

To create and maintain a high quality lawn use an appropriate seedbed fertiliser before sowing. Once the lawn is established apply an appropriate lawn feed as required and overseed the lawn annually.
