

LOGICS

Lolium westerwoldicum

- "Italian - Annual" type
- Number one in competitive strength
- Top persistency
- High summer yield

Yield is most important

Top summer performance with a high total dry matter yield is what annual ryegrass stands for and this is logically provided by LOGICS.

Outstanding performance

A variety has to show improvement to be recommended in the Swiss trials and LOGICS demonstrated excellent early vigour and an exceptional competitive strength.

Almost as persistent as an Italian ryegrass

For "persistence" LOGICS was among the best in the field of trial candidates. More important than endurance for an annual ryegrass, is the resistance to leaf diseases, again LOGICS obtained high scores and showed very good resistance. All in all it is very logical to use LOGICS in rotational farming.

Technical Specifications

- Westerwold/annual ryegrass
- It may sound contradictory but Logics is a persistent Westerwold variety
- Listed/recommended in EU CZ RU SK
- Lateness: Intermediate

LOGICS - Results from Swiss Testing

Results 2013-15. Scale 1 = very high or good; 9 = very low or bad

	Total yield	1st cut yield	General impression	Early vigour	Persistency	Resistance to leaf diseases
Standard	5,5	5,3	3,4	4.0	4,6	3,7
Logics	3	4,2	2,6	3,3	3,9	2,9

Ratings

Scale 1-9, where 9 = best or most pronounced
