

MAGENA

Lolium perenne

- Exceptional high persistency
- Very high second cut
- Good rust resistance

Extreme good Persistence

MAGENA ranks #1 for persistence in Holland.

Rust resistant and high yields

MAGENA ranks at the very top for rust resistance on the Dutch recommended list. The variety is late in the intermediate group, what results in a extremely high yield in the second cut. The combination of high disease resistance and high yield makes it a strong variety in the Netherlands.

Winter-hardiness

MAGENA is one of the best winter-hardy variety, with the highest score on the Dutch variety list.
