

MANOR

Agrostis capillaris

- Outstanding fineness and density
- Light green colour which helps mask *Poa annua* invasion
- Can be used for all parts of a golf course
- Especially suitable for greens

Perfect putting surface

Manor has exceptional shoot density and a high tolerance to close mown wear, helping to prevent the spread of *Poa annua*. Manor also has excellent tolerance to fusarium.

An ideal alternative to a fescue for inland courses wishing to reduce *Poa annua* and improve green speed.

Characteristics & Uses

The fineness and density of Manor browntop bent produces putting greens of outstanding quality. It displays a light green colour which aids the masking of *Poa annua* present in a sward.

Manor browntop can be used for greens, tees, fairways and roughs and is also a good choice for low or high maintenance lawns where superior quality is desired.

Technical Specifications

- Browntop bent
- Exceptional shoot density and a high tolerance to close mown wear
- Listed/recommended in EU NL UK
