

MELFORCE

Lolium perenne

- Top yielding throughout the season
- Very large spring window
- Extremely high rust resistance
- Very high yielding for cutting and grazing

Excellent yield through the year

With the highest yield the entire season and an extremely high rust resistance MELFORCE is the absolute top variety on the recommended list in The Netherlands. Aftermath heading is very reduced, qualifying MELFORCE for grazing purposes.

Excellent disease resistance

MELFORCE proved significantly better rust resistance than the previous top varieties.

Outstanding persistency

For a tetraploid is MELFORCE an excellent variety for grazing with the highest ranking for persistency. The dense sward makes sure you get the top yield for both cutting and grazing.
