

MIRAGE 2

Cynodon dactylon

- Strong wear tolerance
- Cold tolerant
- Early spring green-up
- Quick establishment

4salt

Quick Facts

MIRAGE II is a new and improved cold tolerant seeded bermudagrass derived from crosses of northern and southern adapted bermudagrasses.

Improved quality and spring green-up

Mirage II provides improved turf quality, early spring green-up, uniform turf and significantly more decumbent growth than common bermudagrass.

Dark and dense

Mirage II is moderately dark green and dense. This is our improved version of Mirage which was a top scorer in numerous NTEP trials.

Uses

MIRAGE II was developed exclusively for low cut utilization in temperate sub-tropical climates where warm season grasses are adapted. Mirage II can be successfully utilized in full sun on home lawns, sports fields, parks and golf course tees, fairways and roughs.

Technical Specifications

- Bermuda grass
- Dense & Strong
- Listed/recommended in EU IT
