

# QUICKSTON

*Lolium westerwoldicum*

- Rapid installation
- Low minimum germination temperature
- Accelerates ground cover & acts as nurse crop
- Disappearing rapidly!

## 4salt

### **Fast establishment = fast ground cover = preserving playing quality**

Visual appearance is important, but the role of Quickston is above all to secure a quick establishment in difficult situations and then disappear !

### **The perfect nurse crop**

The low percent of Quickston that we recommend for mixtures is due to the fact that it's role is producing a quick ground cover but also allowing safe and fast establishment of the perennial species in the mixture.

### **Quickston has a darker green colour than previous generations**

This is sometimes an advantage for a more homogeneous appearance.

### **Finer leaves**

The leaf texture is finer and again an advantage in terms of visual appearance.
