

RHYTHM

Poa pratensis

- Very dark green color
- Good heat tolerance
- Performs with low input
- Disease resistant

Quick Facts

RHYTHM is a Compact-Midnight-type Kentucky bluegrass. Rhythm exhibits darker genetic color and improved resistance to leaf spot diseases when compared with competing varieties.

Very fine and dense turf

Rhythm is confirming very high density and a fine leaf texture.

Developed for heat tolerance

RHYTHM was developed for heat tolerance. It is an excellent choice for areas in the southern edge of the Kentucky bluegrass growing region. It is wear tolerant and repairs itself with rhizomes.

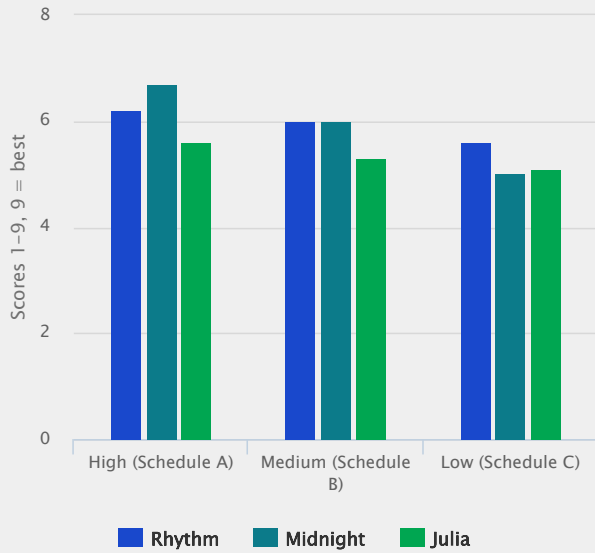

Technical Specifications

- Kentucky bluegrass
