

# SEROA

Festuca trichophylla

- Superb visual appearance
- Very high density
- Salt and Drought tolerant
- First choice for golf greens, fairways and quality lawns

## 4salt

Our new slender creeping red fescue, SEROA has many benefits.

For golf it has exceptional visual merit combined with high density making it ideal for fescue greens

These characteristics are repeated in the lawn/summer sports trials proving good all around performance

Being a slender creeping red fescue is has excellent drought tolerance, in SEROA'S case combined with excellent salt tolerance
