

# SIKEM

*Lolium multiflorum*

- Growth starts very early in spring
- Good standing ability
- Good disease resistance
- Good winterhardiness

## Earliness

SIKEM has a medium heading date, however, growth starts very early in spring and maximizes the opportunity for a high forage quality from the first cut.

## Good Standing Ability

SIKEM has a good standing ability thus minimizing the soil contamination by harvest, hereby offering a higher value in terms of feeding.

## Good Disease Resistance

SIKEM has proven to have a good resistance to common diseases of ryegrasses like mildew and Rhynchosporium. A healthy crop leads to an increased palatability of the grass.

## Good Winter hardiness

SIKEM has in many countries shown exceptionally good winterhardiness in terms of tolerance to some frost.
