

SUEZ

Trifolium pratense

- High yielding diploid
- Persistent
- Good resistance to diseases
- Mid-early to early

Yield and Establishment

SUEZ is easy to establish and is producing high yields of healthy green matter and belongs to the group of persistent red clover varieties.

Disease Resistant

For a diploid variety, SUEZ shows very good resistance to diseases.

Early/Mid-Early Flowering

Despite early flowering SUEZ has a high resistance to lodging - allowing it to start again rapidly after each cut.

Excellent Mixing Partner

SUEZ fits fine in most clover based mixtures due to excellent behaviour growing together with grasses and flexible adaptation to various managements.
