

TURFWAY

Festuca arundinacea

- Intense dark green colour
- High performance for Sport as for Lawn
- Wide disease tolerance
- Withstands intense wear

4salt

Intercontinental

Turfway managed to perform very well in the demanding French official trials as well as in the latest NTEP series (sowing 2012).

It combines dark green color with superior heat tolerance for excellent summer performance. The dark green color persists into winter and returns early in the spring.

Disease tolerant, including brown patch

High tolerance to Microdochium, red thread disease and leaf spot, but also to the frequently occurring brown patch.

Uses

Turfway is recommended for permanent turf in full sun to shade in lawns, parks, sports field, sod farms, and golf course roughs. The ideal mixture companion species is smooth stalked meadow grass (Kentucky bluegrass).

And Turfway features remarkable salt tolerance.

Technical Specifications

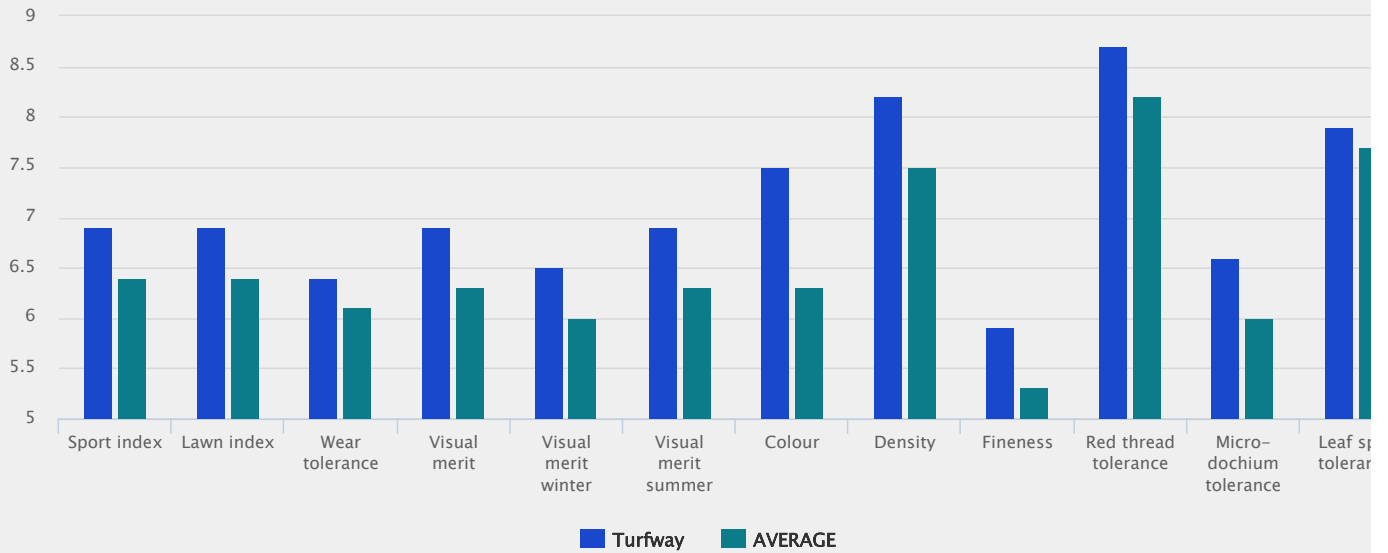

- Tall fescue
- High density, fine leaves and intense dark colour
- Listed/recommended in EU FR TR UK
