

VERSAMAX BEEF

ForageMax

- All-round mixture
- Wear tolerant
- High dry matter content
- 2 climate specific versions

VersaMax Beef

Intensive wear tolerant beef cattle pasture with high dry matter content and palatability for regions with sufficient rainfall.

VersaMax Beef comes in two versions: One mixture for cold and temperate regions, including white clover and ryegrasses, and one for hot and dry areas based on red clover, hybrid ryegrass and tall fescue.

Seeding rate, KG/HA: 30-35
