Ratings

Besser = superior

Unbeatable yield performance means superior in this character in the Benelux trials for BESSER. If you look at the headlines of this variety, the question arises what else do you need from a Perennial Ryegrass variety?

It has all you need for a high performing top quality to implement in a pasture to feed highly performing animals.

Prime spring growth together with a top yield even improving over the years. Together with the first rate rust resistance you are also ensured that you have high quality feed all year round.

That is still something special!
