

GONDOLIN

Festuca rubra rubra

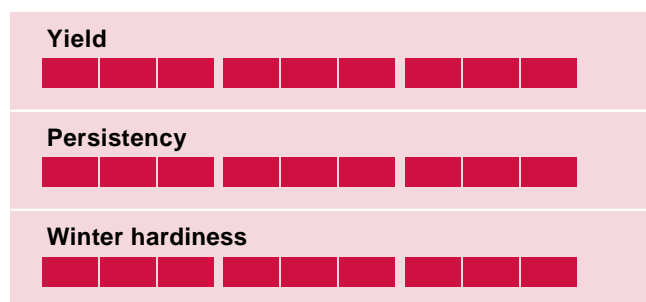

Strong creeping red fescue

An all-round, high performing and robust forage grass

- Wear tolerant and suitable for grazing
- Highly adaptive to various climatic conditions
- Excellent ground cover and high yielding
- Very robust and winter hardy

Ratings

GONDOLIN not only provides high yield but it also gives an excellent groundcover due to its strong rhizomes. It is robust and suitable for most types of soils under widely varying moisture conditions and even thrives in periods of drought.

It is frost resistant and even tolerates surface water during the winter. It is suitable for both conservation and grazing.

Yield per hectare

Official Danish trials 2014/15

Year	Gondolin	Control
2014	152,5	149
2015	150,8	147,7
