### Ratings

### One in a Thousand

JIVET shows exceptionally large adaptation to climates and growing conditions.

This is evidence of a very high concentration of good genes in the genome.

### Fast Yields

The main reason for growing westerwold ryegrass is to obtain as high yields as fast as possible.

JIVET proves its superiority by being on top of several variety lists.

### Reliable Quality

JIVET shows high lodging and rust resistance, Xanthomonas tolerance – all parameters assuring higher quality and yield.
