

ALLSTARTER

Lolium perenne

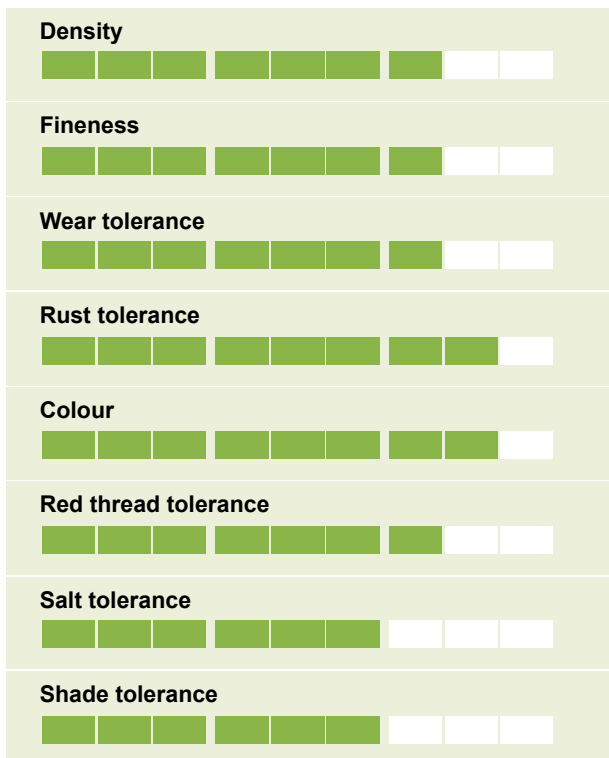

Perennial ryegrass

Dark green top rated disease tolerant multipurpose variety

- Excellent disease tolerance
- Superb visual merit during winter
- Fine leaf texture
- Healthy dark green colour

Ratings

Exceptional during the winter

Allstarter (ALL STAR 3) is simply outstanding during the winter months, highly appreciable in regions with a playing season from autumn to spring. Very good results are obtained for overseeding of dormant Bermudagrass.

Performance

Allstarter is rated in the top group of varieties for overall turf quality in a recent NTEP test. It has excellent seedling vigour and rapid establishment. Allstarter is also outstanding in French official trials where it is top rated for disease resistance - rusts, Drechslera leafspot and Microdochium patch in particular.

Exceptional dark colour

By 2012 Allstarter is actually the darkest green variety on the French list. As the density and fineness of leaves are also excellent, the visual merit is a strong argument for entering Allstarter in mixtures for multiple sport purposes as well as parks and home lawns.
