

Strong creeping red fescue

Nothing Mystic About the Quality

- High persistency
- Very high shoot density
- High resistance to rust
- High resistance to fusarium

Ratings

High Shoot Density

Strong creeping red fescue has normally not the highest shoot density, but Mystic is breaking this rule as it has got a density far above what was used to be known for this type of red fescue.

The Very Best Disease Resistance

Often a variety has got one strong point in disease resistance, but Mystic has got several! In the official trials in France, Mystic has scored high resistance not only in both rust - and helminthosporium resistance, but also against fusarium.

Result = Topscoring in rating for general impression on the French list!

MYSTIC - Top of the table!

Bulletin Gazon 2012 (GEVES, France). Scores 1-9, 9 = best.

	Wear	Density	Persistency	Fineness	Rust tolerance	Winter aspect	Leaf spot resistance	Installation
